**pTrees** (predicate trees and their associated technology)

Compressed, datamining-ready, vertical data.
Fast, accurate horizontal processing.

**PINE** (Podium Incremental Neighborhood Evaluator)

For Closed Nearest Neighbor Classification (CNNC)

**FAUST** (Fast, Accurate, Unsupervised and Supervised treemining)

For fast classification and clustering of spatial data.

**MYRRH** (ManY-Relationship-Rule Harvester)

For strong rule mining across multiple relationships.

(Myrrh: aromatic oleoresin of a thorny tree)
